- **CSS** : folder for Style Sheet
- **fonts**: folder for Awsome font files
- **images**: folder of some images for plugins
- **img**: folder for all images for the template
- **js**: folder for all javascript files
- **404.html**: HTML page for 404 error page
- **about.html**: HTML page for about us sections
- **animations.html**: HTML page for animations
- **blog.html**
- **blog-masonry-2-columns.html**
- **blog-masonry-2-columns-sidebar.html**
- **blog-masonry-3-columns.html**
- **blog-single.html**
- **contact.html**: HTML page for contact sections
- **footer.html**: HTML page for footer sections
- **icons.html**: HTML page for icons
- **index.html**: HTML page for home page style 1
- **index_2.html**: HTML page for home page style 2
- **index_3.html**: HTML page for home page style 3
- **index_4.html**: HTML page for home page with Parallax Slider Background
- **index_5.html**: HTML page for home page with Full Video Background
- **index_6.html**: HTML page for home page with animated background
- **index_7.html**: HTML page for home page with Pattern Background
- **index_8.html**: HTML page for home page with solid background
- **list.txt**: text file for subscribers email list
- **mailer.php**: PHP file that send emails with PHP
- **menu.html**: HTML page for menu sections

- **portfolio-item-1.html**: HTML file for portfolio project style 1
- **portfolio-item-2.html**: HTML file for portfolio project style 2
- **portfolio-item-3.html**: HTML file for portfolio project style 3
- **portfolio-item-4.html**: HTML file for portfolio project style 4
- **portfolio-item-5.html**: HTML file for portfolio project style 5
- **price.html**: HTML page for price sections
- **product.html**: HTML page for product sections
- **service.html**: HTML page for service sections
- **shortcodes.html**: HTML page for shortcodes
- **skills.html**: HTML page for skills sections
- **statics.html**: HTML page for statics sections
- **subscribe.html**: HTML page for subscribe & action sections
- **subscribe.php**: PHP file for subscription functions
- **team.html**: HTML page for team sections
- **testimonial.html**: HTML page for testimonials sections

CSS: Style Sheet files

- **animate.css**: CSS file for animation plugins
- **bootstrap.css**: Bootstrap default file
- **color_1.css**: CSS File for colors
- **color_2.css**: CSS File for colors
- **color_3.css**: CSS File for colors
- **color_4.css**: CSS File for colors
- **color_5.css**: CSS File for colors
- **color_6.css**: CSS File for colors
- **color_7.css**: CSS File for colors
- **color_8.css**: CSS File for colors
- **color_9.css**: CSS File for colors
- **color_10.css**: CSS File for colors
- **color_11.css**: CSS File for colors
- **color_12.css**: CSS File for colors
- **color_13.css**: CSS File for colors
- **color_14.css**: CSS File for colors
- **color_15.css**: CSS File for colors
- **color_16.css**: CSS File for colors

- **color_17.css**: CSS File for colors
- **color_18.css**: CSS File for colors
- **color_19.css**: CSS File for colors
- **color_20.css**: CSS File for colors
- **filters.svg**: SVG file for grey effect on hover
- **font-awesome.min.css**: default CSS file for font awesome plugin
- **jquery.bxslider.css**: Default CSS file for bxslider plugin
- **awl.carousel.css**: default CSS file for OwlCarousel plugin
- **prettyPhoto.css**: Default CSS file for PrettyPhoto plugin
- **reset.css**: CSS file to reset values for all browsers
- **style.css**: CSS file for template styles

js: JavaScript files

- **twitter [folder]**: Folder for tweets plugin
- **bootstrap.min.js**: JS file for bootstrap components
- **enquire.min.js**: JS file for enquire plugin
- **gmap3.min.js**: JS file for google map plugin
- **jquery.appear.js**: JS file for appear plugin
- **jquery.bxslider.min.js**: JS file for bxslider plugin
- **jquery.countTo.js**: JS file for count plugin
- **jquery.easing.1.3.js**: JS file for easing plugin
- **jquery.easy-pie-chart.js**: JS file for easy pie chart plugin
- **jquery.fitvids.js**: JS file for fitvids plugin
- **jquery.isotope.min.js**: JS file for isotope plugin
- **jquery.jplayer.min.js**: JS file for jplayer plugin
- **jquery.mb.YTPlayer.js**: JS file for mb.YTPlayer plugin
- **jquery.nav.js**: JS file for nav plugin
- **jquery.nicescroll.js**: JS file for nice scroll plugin
- **jquery.prettyPhoto.js**: JS file for pretty Photo plugin
- **jquery.sticky.js**: JS file for sticky plugin
- **jquery.superslides.min.js**: JS file for super slides plugin
- **jquery-1.11.0.min.js**: JS file for jQuery
- **masonry.js**: JS file for masonry plugin
- **modernizr-latest.js**: JS file for modernizer
- **owl.carousel.min.js**: JS file for owl carousel plugin
- **script.js**: JS file for custom jquery queries for the template
- **script_masonry2b.js**: JS file for custom query for masonry blog
- **script_masonryb.js**: JS file for custom query for masonry blog
- **wow.min.js**: JS file for Wow animations plugin

HTML Structure

This template is developed by Bootstrap framework. Code is well organized and commented. See the complete reference structure of the template.

Each block on the HTML page is used as a section on the code. We used “container”, “row” “cols” classes from bootstrap framework to organize blocks.

```
<!-- Loader page -->
<div id="pageloader">
  <div class="loader-item text-center">
    <div class="loader">Loading...</div>
  </div>
</div>
<!-- End loader page -->

<!-- Primary Page Layout
===== -->

<div id="home">

  <div id="slides_background_home">
    <div class="slides-container">
      <div class="img1"></div>
    </div>
  </div>

  <div class="container main">
    
    <div class="fullbg_bigtxt">Smart Web Agency</div>
    <div class="fullbg_smalltxt">We create awesome One Page HTML Templates</div>
    <div class="fullbg_btn wow bounce" data-wow-delay="4s" data-wow-iteration="3"><a href="#about" class
    ="btn_fullgb">Start Now</a></div>
  </div>

</div>
```

Bootstrap Framework Setup

Sertin is completely built with Bootstrap 3.0.3 responsive framework which is the best front-end development framework available at present. It is very easy to edit the layout as well as for making any advanced customization. Kindly note, you have to familiarize Bootstrap’s native arrangements (it is easy) and short codes before you proceed.

Bootstrap’s grid system

The default Bootstrap grid system utilizes 12 columns, with the responsive CSS file added, the grid adapts to be 724px, 940px and 1170px wide depending on your viewport.

Below 767px viewports, the columns become fluid and stack vertically.

Setting up the grid – HTML

For a simple two column layout, create a .row and add the appropriate number of . col-md* columns. As this is a 12- column grid, each . col-md* spans a number of those 12 columns, and should always add up to 12 for each row (or the number of columns in the parent). Please see the markup:

```
<div class="row">
  <div class="col-md-1">.col-md-1</div>
  <div class="col-md-1">.col-md-1</div>
  <div class="col-md-1">.col-md-1</div>
  <div class="col-md-1">.col-md-1</div>
  <div class="col-md-1">.col-md-1</div>
  <div class="col-md-1">.col-md-1</div>
  <div class="col-md-1">.col-md-1</div>
  <div class="col-md-1">.col-md-1</div>
  <div class="col-md-1">.col-md-1</div>
  <div class="col-md-1">.col-md-1</div>
  <div class="col-md-1">.col-md-1</div>
  <div class="col-md-1">.col-md-1</div>
</div>
<div class="row">
  <div class="col-md-8">.col-md-8</div>
  <div class="col-md-4">.col-md-4</div>
</div>
<div class="row">
  <div class="col-md-4">.col-md-4</div>
  <div class="col-md-4">.col-md-4</div>
  <div class="col-md-4">.col-md-4</div>
</div>
<div class="row">
  <div class="col-md-6">.col-md-6</div>
  <div class="col-md-6">.col-md-6</div>
</div>
```

</div>

We are having page limitation to explain everything about Bootstrap here. So for more information we refer to original documentation for Bootstrap, found here: <http://getbootstrap.com/>

Disabling responsiveness

Bootstrap automatically adapts your pages for various screen sizes. Here's how to disable this feature so your page works like in this non-responsive example.

Steps to disable page responsiveness

Omit the viewport <meta> mentioned in the CSS docs

Override the width on the .container for each grid tier with a single width, for example width: 970px; Be sure that this comes after the default Bootstrap CSS. You can optionally avoid the !important with media queries or some selector-fu.

For grid layouts, use .col-xs-* classes in addition to, or in place of, the medium/large ones. Don't worry, the extra-small device grid scales to all resolutions.

More information here : <http://getbootstrap.com/getting-started/#disable-responsive>

Top section

The top section present the full first screen, we have in this template 6 options

- 1- Full image background
- 2- Full Parallax Slider
- 3- Full Video Background
- 4- Full Animated Background
- 5- Full Pattern Background
- 6- Full Solid Background

So, let's take those 6 options:

1- Full image background:

The file `index.html` represents this feature and to change the image on the background you need to change this part of the code

```
<div id="slides_background_home">
```

```

    <div class="slides-container">
        <div class="img1"></div>
    </div>
</div>

```

We have included 20 ready background to use, you can use from 1 to 20 ready background images found on the IMG folder or you can edit this part on the css file "style.css" and create your own background

```

#slides_background_home .slides-container .img1{
    background:url(../img/bg6.jpg) center fixed ;
}

```

2- Full Parallax Slider

The file `index_4.html` include on top this feature, so to edit the slider you have this part of the code

```

<div class="slides-container">
    <div class="img1"></div>
    <div class="img2"></div>
    <div class="img3"></div>
    <div class="img4"></div>
</div>

```

Each div is a background image, in this example we have 4 images in the slider, you can add as many images you want and you can custom your images by choosing the image number or you can custom your own background from CSS style.css file as this one

```

#slides_background_home .slides-container .img1{
    background:url(../img/bg6.jpg) center fixed ;
}

```

3- Full Video Background

The file `index_5.html` includes this feature and the video is a youtube video and can be edited from this part on the HTML code:

```

<div class="slides-container">
    <!-- Video -->
    <div id="P3" class="player video-container" data-property="{videoURL:'
VL_G4SNaGM',containment:'#slides_background',autoPlay:true, mute:true, startAt:0,
opacity:0.5}"></div>
    <!-- End Video -->
</div>

```

You can change this value by the URL of the youtube video, just delete the part

`http://www.youtube.com/watch?v=` and let the other part like this ➔

`http://www.youtube.com/watch?v=VL_G4SNaGM`

```

<div id="slides_background">
  <div class="slides-container">
    <!-- Video -->
    <div id="P3" class="player video-container" data-property="{videoURL:'-VL_G4SNaGM',
    containment:'#slides_background',autoplay:true, mute:true, startAt:0, opacity:0.5}"></div>
    <!-- End Video -->
  </div>
</div>

```

So options can be changed:

- **opacity:** 1 //(int) 0 → Set the opacity of the player;
- **mute:** true //(boolean) mute the audio;
- **showControls:** true // or false If you set the player as background you can show controls adding this parameter;
- **ratio:** '4/3' or "16/9" to set the aspect ratio of the movie;
- **quality:** 'default' or "small", "medium", "large", "hd720", "hd1080", "highres";
- **containment:** (string) the CSS selector of the DOM element where you want the video background; if not specified it takes the "body"; if set to "self" the player will be instanced on that element;
- **optimizeDisplay:** true (boolean) will fit the video size into the window size optimizing the view;
- **loop:** true (boolean) or false loops the movie once ended.
- **vol:** 1 to 100 (number) set the volume level of the video.
- **startAt:** 20 (int) Set the seconds the video should start at.
- **autoplay:** true (boolean) or false play the video once ready.
- **showYTLogo:** true (boolean) Show or hide the YT logo and the link to the original video URL.
- **showControls:** true (boolean) Show or hide the controls bar at the bottom of the page.

4- Full Animated Background

The file `index_6.html` includes this feature. The code is exactly as the simple image background, you can use any image but just add this class

```

<div class="slides-container">
  <div class="img5 home_animated"></div>
</div>

```

And the background will be animated.

5- Full Pattern Background

The file `index_7.html` includes this feature. You can change the pattern from Style.css file from this part of the code :

```

#slides_background_home .slides-container .img6{
  background:url(../img/pattern_2.png) center fixed ;
}

```

6- Full Solid Background

The file `index_8.html` includes this feature and the color of the background is related to the color chosen for the template. So to change the color, you need to change the `Color_X.css` file or from the `css` color file used, on this code part:

```
#slides_background_home .slides-container .solid_bg{  
    background:#f48e0b center fixed ;  
}
```

```
#slides_background_home .slides-container .solid_bg{  
    background:#f48e0b center fixed ;  
}
```

About Us Section

To make the about us section more beautiful and to have many possibilities, we have made the about us page `about.html`, that include many sections to make on the page.

To change the about us section, you only need to copy the code from `about.html` and to past it in your HTML page.

```
<!-- About Us Style 1 Section  
===== -->  
<section id="about" class="container">  
  <div class="big_title">  
    <div class="big_title_txt roboto_font">About <span class="text_color">Us</span></div>  
    <div class="text_und_big_title">  
      We are an award winning creative agency based in Wisconsin with a passion for helping our clients  
      grow.  
    </div>  
  </div>  
  <div class="section_content about_1">  
    <div class="row">  
      <div class="col-md-7">  
        <div class="company_prg1 opaque">  
          <div class="content_big_title">  
            The <span class="text_color">Best </span>Graphic <span class="text_color">Company</  
            span>  
          </div>  
          <p>Lorem ipsum dolor sit amet, consectetur adipisicing elit, sed do eiusmod tempor  
            incididunt ut labore et dolore magna aliqua. Ut enim ad minim veniam, quis nostrud  
            exercitation ullamco laboris nisi ut aliquip ex ea commodo consequat.  
            Duis aute irure dolor in reprehenderit in voluptate velit esse cillum dolore eu fugiat  
            nulla pariatur.</p>  
          <div class="company_btn">  
            <a href="#" class="content_btn">Check Our Projects</a>  
          </div>  
        </div>  
      </div>  
      <div class="col-md-5 vimeo_video">  
        <iframe src="//player.vimeo.com/video/93175979" width="500" height="281" frameborder="0"  
          webkitallowfullscreen mozallowfullscreen allowfullscreen></iframe>  
      </div>  
    </div>  
  </div>  
</section>
```

Our Company Section

This section is made especially for Sertin template, it include 4 blocks for 4 activities for the company. To edit it just go to “Our Company Section” on the code and make your changes. For images you need **270X148** image.

Our Company

We are an award winning creative agency based in Wisconsin with a passion for helping our clients grow.

Consulting

Photography

[Check Our Projects](#)

Simple Text Background Section

This is a simple section to display a short text. Colored text need to be in this code

`` to have the template color. To change the background you need to change the CSS part: `background: url(../img/bg1.jpg) no-repeat 0 0 fixed;`

```
/* Simple text Background */
#simple_txt_background{
  background: url(../img/bg1.jpg) no-repeat 0 0 fixed;
  width:100%;
  height: 100%;
  opacity:1;
  -webkit-background-size: cover;
  -moz-background-size: cover;
  -o-background-size: cover;
  background-size: cover;
  padding: 135px 0px;
}
```

Our Team Section

We have made this section to make the possibility to add many persons on the team. For each person when you click on it, you get a nice animation then the person details will be displayed.

Our Team

We are an award winning creative agency based in Wisconsin with a passion for helping our clients grow.

Catherin Pilcher

Biography:

Catherin makes sculptures and drawings. With the use of appropriated materials which are borrowed from a day-to-day context alva desperatos creates.

Follow:

Team image details: 193px X 178px.

You have also more possibilities to include in the team section, from the team.html page. You just need to copy and paste the section code, change team images and social icons. To change icons please check icons section.

Our Team

We are an award winning creative agency based in Wisconsin with a passion for helping our clients.

YOLANDA GRACE

/ Web Developer

We make best offers to boost your brand name of your business quia conntur magni dolores eositals sequi ratione voluptatem amistalap hadnar cebet.

HARRY MORALES

/ Web Designer

We make best offers to boost your brand name of your business quia conntur magni dolores eositals sequi ratione voluptatem amistalap hadnar cebet.

TYRONE SMALLWOOD

/ Video Producer

HARRY MORALES

/ Photographer

We make best offers to boost your brand name of your business quia conntur magni dolores eositals sequi ratione voluptatem amistalap hadnar cebet.

Our Managers Section

This part is like the last one for team. Images and block are responsive and centered. You can include as many persons you need. On hove information and social links will be displayed. If you will need some adjustments please check the file style.css on the team managers' part.

Our Managers

We are an award winning creative agency based in Wisconsin with a passion for helping our clients grow.

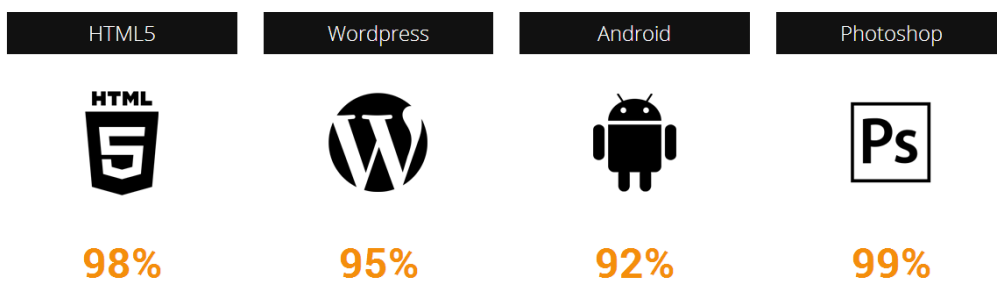

Best Skills Section

For skills section you have a variety of section included on the page skills.html that you can copy/past the code into your page.

Best Skills

We are an award winning creative agency based in Wisconsin with a passion for helping our clients grow.

For numbers, they have an animation display, so you have to make modifications on two parts on the code:

```
<div class="skills_content_nmbr text_color" data-perc="98"><span class="factor">98</span>%</div>
```

And those two parts need to have equal value the one on the data-perc attribute have the priority to be displayed.

```
<div class="col-md-3 col-sm-6 col-xs-6 text-center skills_content_block">
  <div class="skills_content_title">HTML5</div>
  
  <div class="skills_content_nmbr text_color" data-perc="98"><span class="factor">98</span>%</div>
</div>
```

Video Background Section

As mentioned on the top, this section have the same option as the video background on the top, so editing it need youtube URL and editing options on the code.

```
<!-- Video Background Section
===== -->

<section id="video">
  <div class="container">
    <div class="row text-center video_bg_content">
      <i class="bgt_left"></i>
      <div class="big_title_txt_bg">
        FULL <span class="text_color">WIDTH</span> VIDEO <span class="text_color"> BACKGROUND</span>
      </div>
      <i class="bgt_right"></i>
      <div id="P2" class="player video-container" data-property="{videoURL:'https://www.youtube.com/watch?v=V6_85cSOIcE',containment:'#video',autoplay:true, mute:true, startAt:0, opacity:1}"></div>
    </div>
  </div>
</section> |
```

So options can be changed:

- **opacity:** 1 //(int) 0 → Set the opacity of the player;
- **mute:** true //(boolean) mute the audio;
- **showControls:** true // or false If you set the player as background you can show controls adding this parameter;
- **ratio:** '4/3' or "16/9" to set the aspect ratio of the movie;
- **quality:** 'default' or "small", "medium", "large", "hd720", "hd1080", "highres";

- **containment:** (string) the CSS selector of the DOM element where you want the video background; if not specified it takes the “body”; if set to “self” the player will be instantiated on that element;
- **optimizeDisplay:** true (boolean) will fit the video size into the window size optimizing the view;
- **loop:** true (boolean) or false loops the movie once ended.
- **vol:** 1 to 100 (number) set the volume level of the video.
- **startAt:** 20 (int) Set the seconds the video should start at.
- **autoplay:** true (boolean) or false play the video once ready.
- **showYTLogo:** true (boolean) Show or hide the YT logo and the link to the original video URL.

showControls: true (boolean) Show or hide the controls bar at the bottom of the page.

Our Services Section:

From the service page service.html and from the index page, you have many sections to include in this part. Just copy/past the code of the section you need.

For changing icons please check the icons part in this documentation.

Our Price Section

Also this section has many abilities to include, table with 2, 3 or 4 columns for product pricing. The page price.html show al this and you can copy/part you chosen section.

Our Price

We are an award winning creative agency based in Wisconsin with a passion for helping our clients grow.

Basic Package	Premium Package	Gold Package
\$19.99 /month	\$49.99 /month	\$99.99 /month
1 User	5 Users	Unlimited Users
3 Active Projects	15 Active Projects	Unlimited Active Projects
5 Gb Storage	25 Gb Storage	Unlimited Storage
Sign Up	Sign Up	Sign Up

Our Portfolio Section

The portfolio is made by isotope plugin, a great plugin to display filterable and animated portfolio. So editing this part need to steps. One, you must edit the filters section by making what you need and it's very important that you make the correct "data-filter" attribute, it must be the same as the class you will make in the image DIV. So don't forget to make the same to make the data filterable and you get good results.

Images in the portfolio is displayed by prettyPhoto plugin. This allow you to display your items as a popup with the ability to make great lightbox display for: single image, images gallery, images slide show, youtube video, vimeo video, iframe, and many other features you can check here :

<http://www.no-margin-for-errors.com/projects/prettyphoto-jquery-lightbox-clone/>

```

<!-- Our Portfolio Section

            linkz_transition">Read More</a>
          </div>
        </div>
      </div>
    </div>
  </div>
</div>

```

Our Partners Section

In partner section you can include as many logos as you want. The number displayed will be 5 logos.

```

<!-- Our Partners Section
===== -->
<section id="partners" class="container">
  <div class="big_title">
    <div class="big_title_txt roboto_font">Our <span class="text_color">Partners</span></div>
    <div class="text_und_big_title">
      We focus to make our partners happy and glad to work with us..
    </div>
  </div>
  <div class="section_content">
    <div class="row_partner_items">
      <div class="item"></div>
      <div class="item"></div>
      <div class="item"></div>
      <div class="item"></div>
      <div class="item"></div>
      <div class="item"></div>
      <div class="item"></div>
    </div>
  </div>
</section>

```

You can chose the number of displayed logos from script.js in JS folder

```
/* Partners Block */
$($(".partner_items").owlCarousel({
  autoPlay: 3000, //Set AutoPlay to 3 seconds
  items : 5,
  itemsDesktop : [1199,4],
  itemsDesktopSmall : [979,3],
  itemsTablet : [768,2],
  navigation : false,
  pagination : false
}));
```

Some Testimonials Section

The page testimonials.html has many blocks and sections to include. You just need to change text and images.

Some Testimonials

We are an award winning creative agency based in Wisconsin with a passion for helping our clients grow.

“

The best one page html template I have ever seen. I used it for many prjects and many clients recommended every time this template. You purshase it for \$14 but you win more this price.

Thomas Cuadra
Founder, PICN

“

The best one page html template I have ever seen. I used it for many prjects and many clients recommended every time this template. You purshase it for \$14 but you win more this price.

James Keys
UI/UX Designer

“

The best one page html template I have ever seen. I used it for many prjects and many clients recommended every time this template. You purshase it for \$14 but you win more this price.

Kristal Hennessey
Founder, Bear Software

Latest Tweets Section

The question here is how to edit this section to get tweets from your twitter account.

First you need to get the twitter API consumer and secret keys:

- 1- Go to <https://dev.twitter.com/apps/new> and log in, if necessary
- 2- Enter your Application Name, Description and your website address. You can leave the callback URL empty.
- 3- Accept the TOS, and solve the CAPTCHA.
- 4- Submit the form by clicking the Create your Twitter Application
- 5- Copy the consumer key (API key) and consumer secret from the screen into your application

[Home](#) → [My applications](#)

Create an application

Application Details

Name: *

Your application name. This is used to attribute the source of a tweet and in user-facing authorization screens. 32 characters max.

Description: *

Your application description, which will be shown in user-facing authorization screens. Between 10 and 200 characters max.

Website: *

Your application's publicly accessible home page, where users can go to download, make use of, or find out more information about your application. This fully-qualified URL is used in the source attribution for tweets created by your application and will be shown in user-facing authorization screens. (If you don't have a URL yet, just put a placeholder here but remember to change it later.)

Callback URL:

Where should we return after successfully authenticating? For [@Anywhere applications](#), only the domain specified in the callback will be used. [OAuth 1.0a](#) applications should explicitly specify their `oauth_callback` URL on the request token step, regardless of the value given here. To restrict your application from using callbacks, leave this field blank.

6- Create Your Access Token for OAuth

OAuth settings

Your application's OAuth settings. Keep the "Consumer secret" a secret. This key should never be human-readable in your application.

Access level	Read-only About the application permission model
Consumer key	—
Consumer secret	—
Request token URL	https://api.twitter.com/oauth/request_token
Authorize URL	https://api.twitter.com/oauth/authorize
Access token URL	https://api.twitter.com/oauth/access_token
Callback URL	None
Sign in with Twitter	No

Your access token

It looks like you haven't authorized this application for your own Twitter account yet. For your convenience, we give you the opportunity to create your OAuth access token here, so you can start signing your requests right away. The access token generated will reflect your application's current permission level.

[Create my access token](#)

After creating your Twitter Application, you have to give the access to your Twitter Account to use this Application. To do this, click the Create my Access Token.

OAuth settings

Your application's OAuth settings. Keep the "Consumer secret" a secret. This key should never be human-readable in your application.

Access level	Read-only About the application permission model
Consumer key	—
Consumer secret	—
Request token URL	https://api.twitter.com/oauth/request_token
Authorize URL	https://api.twitter.com/oauth/authorize
Access token URL	https://api.twitter.com/oauth/access_token
Callback URL	None
Sign in with Twitter	No

Your access token

It looks like you haven't authorized this application for your own Twitter account yet. For your convenience, we give you the opportunity to create your OAuth access token here, so you can start signing your requests right away. The access token generated will reflect your application's current permission level.

[Create my access token](#)

Get the Consumer Key, Consumer Secret, Access token, Access Token Secret.

Now go to HTML\js\twitter folder and open index.php file with any editor and change those 4 lines

```
// Your Twitter App Consumer Key
private $consumer_key = 'j85kocWntR9ChFFtdBA';

// Your Twitter App Consumer Secret
private $consumer_secret = '2zdGMS904CaCmhBxJsc1gFqhrx444JChUlnDnpfTVcQ';

// Your Twitter App Access Token
private $user_token = '2296324110-Ebwrn3iFTbUhHxsrYtPIkAfqVOB9mnDbv4qDrEH';

// Your Twitter App Access Token Secret
private $user_secret = 'olKh7zUvLFWw1i2cGPihg4QAI0Ze4QiYFmgxSC1yTUbCo';
```

Twitter display needs PHP working on your server.

From The Blog Section

The blog section has many options

- Post with image
- Post with music file
- Post with video
- Post with slider
- Post with quote

And for each port you can have a popup or a link to blog page.

For the Post with image

You have to change this part of code

```
<div class="blog_content_thumbnail">
  
</div>
```

For the Post with music file

You have to change this part of code from HTML page

```
<div class="blog_content_mp3">
  <div id="jquery_jplayer_1" class="jp-jplayer"></div>
  <div id="jp_container_1" class="jp-audio">
    <div class="jp-type-single">
      <div class="jp-gui jp-interface">
        <div class="jp-controls">
          <a href="javascript:;" class="jp-play" tabindex="1">play</a>
          <a href="javascript:;" class="jp-pause" tabindex="1">pause</a>
          <div class="jp-current-time"></div>
          <div class="jp-progress">
            <div class="jp-seeking-bar">
              <div class="jp-play-bar"></div>
            </div>
          </div>
          <div class="jp-volume-bar">
            <div class="jp-volume-bar-value"></div>
          </div>
          <a href="javascript:;" class="jp-mute" tabindex="1" title="mute">mute</a>
          <a href="javascript:;" class="jp-unmute" tabindex="1" title="unmute">unmute</a>
          <div class="jp-duration"></div>
        </div>
        <div class="jp-no-solution">
          <span>Update Required</span>
          To play the media you will need to either update your browser to a recent version or update your <a href="http://get.adobe.com/flashplayer/" target="_blank">Flash plugin</a>.
        </div>
      </div>
    </div>
  </div>
</div>
```

And this part on script.js file

```
/* MP3 Player */
$("#jquery_jplayer_1").jPlayer({
  ready: function () {
    $(this).jPlayer("setMedia", {
      title: "Bubble",
      m4a: "http://www.jplayer.org/audio/m4a/Miaow-07-Bubble.m4a",
      oga: "http://www.jplayer.org/audio/ogg/Miaow-07-Bubble.ogg"
    });
  },
  swfPath: "/js",
  supplied: "m4a, oga"
});
```

So you need to change the two URLs of m4a & ogg files.

For the Post with video

You have to change this part of code

```
<iframe src="//player.vimeo.com/video/92040599?title=0&byline=0" width="500"
height="281" frameborder="0" webkitallowfullscreen mozallowfullscreen allowfullscreen
></iframe>
```

You can find this part on the EMBED part on any vimeo video.

For the Post with Slider

You have to change this part of code

```
<div class="blog_content_thumbnail">
  <div class="slider text-center">
    <ul class="bxslider">
      <li></li>
      <li></li>
      <li></li>
    </ul>
  </div>
</div>
```

And make links for your images

For the Post with Quote

You have to change this part of code

```
<div class="blog_content_quote">
  This is really a great one page template to be used for many business types.
  <div class="blog_content_quote_name">- Rachid Lajmi</div>
</div>
```

And just change the text.

For blog pages you have blog-single.html with a side bar.

Subscribe Section

Get Our News

We are an award winning creative agency based in Wisconsin with a passion for helping our clients grow.

<i>Your email here..</i>	Subscribe
--------------------------	-----------

All subscription emails will be in the file `list.txt`, use any editor like notepad++ to open it

Link do download notepad++ <http://sourceforge.net/projects/notepad-plus/>

Contact Section

From the page contact.html you have many sections that you can include.

Now we need to configure this contact block. Go to mailer.php file and change those 3 lines:

```
define( "RECIPIENT_NAME", "Your name" );
define( "RECIPIENT_EMAIL", "youremail@gmail.com" );
define( "EMAIL_SUBJECT", "Message from Sertin" );

// Define some constants
define( "RECIPIENT_NAME", "Your name" );
define( "RECIPIENT_EMAIL", "youremail@gmail.com" );
define( "EMAIL_SUBJECT", "Message from Topaz" );
```

Animation

To animate any block, please check Animation page from animation.html, choose your animation type then add to the block → **wow** + animation name

```
<div class="wow bounce" data-wow-delay="4s" data-wow-iteration="3"><a href="#about" class="btn_fullgb">Start Now</a></div>
```

You can use **data-wow-delay** for the delay to wait before doing the animation, and **dada-wow-iteration** for the number of repeats for the animation.

Colors:

Color Codes:

Color 1- 955b1c – file (color_1.css)
Color 2- 8e0e05 – file (color_2.css)
Color 3- f48e0b – file (color_3.css)
Color 4- ee3b37 – file (color_4.css)
Color 5- f0762d – file (color_5.css)
Color 6- f2b208 – file (color_6.css)
Color 7- accb03 – file (color_7.css)
Color 8- 458b06 – file (color_8.css)
Color 9- 25c28b – file (color_9.css)
Color 10- 7eb7a4 – file (color_10.css)
Color 11- 278b81 – file (color_11.css)
Color 12- 1cafda – file (color_12.css)
Color 13- 4b99bd – file (color_13.css)
Color 14- 0a83b0 – file (color_14.css)
Color 15- 753faf – file (color_15.css)
Color 16- 9163cf – file (color_16.css)
Color 17- c43ba5 – file (color_17.css)
Color 18- e52ca1 – file (color_18.css)
Color 19- e6135a – file (color_19.css)
Color 20- 969696 – file (color_20.css)

How to change color: you have 20 css file named color_X.css, just chnege the color you want on the index header.

Font

This template use google font, you can change the font on style.css, change the second line

```
@import  
url(http://fonts.googleapis.com/css?family=Open+Sans:300italic,400italic,600italic,700italic,800italic,400,300,600,700,800);
```

```
@import
url(http://fonts.googleapis.com/css?family=Roboto:400,100,100italic,300,300italic,400italic,500,500italic,700,700italic,900,900italic);
```

then change the value on next line

```
body, p, a, blockquote{
    font-family: 'Open Sans', sans-serif;
    font-weight: 300;
    color: #111111;
}
```

Images

All images are displayed on the folder /img, they are free for use.

PSD Files:

The template is supported by well layered PSD file.
